DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement filed reference listed in the information Disclosure Submitted on 05/25/05 have been considered by the examiner (see attached PTO-1449

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. **Claims 1-4**, are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-22 of

Art Unit: 2617

copending Application No. 10/524098. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are claiming the same invention i.e. a method of providing electronic messaging services and he is not entitled to receiving more than one patent.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

During the examination of this application it has been noticed that the applicant has other application would be material to the examination of the instant application.

Applicant is therefore respectfully reminded of the duty to disclose all information known to the applicant which is material to the examination of the instant application in accordance with 37 CFR paragraph 1.56.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Sleevi, Neil F. (US Patent 4,811,382) disclose method and apparatus for applying messages in a telecommunications network

Chavez Jr. et al. (US Patent 6,603,844) disclose advanced ring back in a telecommunication switching system
